Subject: Status of CGS CWIS review

As per your phone call - Yes, we met with Shannon K. and Chuck Coutant and others regarding our concerns for impingement and entrainment at the CGS CWIS. Chuck provided an analysis of the I&E risks posed by the facility. Much of the information provided was factual and germane to the current facility, but other arguments were more conjectural or not clearly germane to the CGS CWIS system. We are formulating responses to ENW's presentation and will provide EFSEC with a copy when done - likely next week.

As regards our review of the permit/fact sheet, we previously commented on the draft and unless substantial changes have occurred since, I see little value in commenting further prior to the public notice. We would be interested in discussing the permit following completion of our response letter to the Coutant paper.

Thanks for keeping us informed on process.
